Education

Computing Science BSc (Hons)
University of Dundee
September 2024 – Present

- Website Development, Network Systems, Software Development, Job Skills, Operating Systems, network defence, Penetration Testing, Scripting, Digital Forensics, API Integration, AI training

Expected Graduation June 2028

Soft Skills

- Problem Solving
 - Teamwork
- Communication
 - Adaptability
- Critical thinking
- Attention to Detail
 - Leadership

Personal Statement

I am a third-year Computing Science student at the University of Dundee with a strong interest in software development, problem solving, and emerging technologies, particularly cybersecurity and AI. I have always been curious about how computers and applications work behind the scenes, and through university and personal projects I have built practical experience in Java, C, C++, Python, and web development, as well as working in Linux environments and using tools such as Kali Linux to explore how systems are attacked and defended. I am now seeking an internship where I can apply these skills within an agile team, contribute to real products, and learn from experienced engineers.

Projects

Social Networking Page

- Designed and created a Java social networking application using linked lists to manage friends and posts
- User could create posts and add and remove friends as well as viewing mutual friends
- Created a video demonstrating the social media website and explained how to use it

Drone Training

- Designed a fake village map using a 2d array, to simulate a small village
- Used python to train a drone to find the most effective path
- The house it delivers to changed each time and remembers

FlagChain

- Built and published a public security portfolio documenting 10+ penetration testing exercises across TryHackMe and HackTheBox, covering web exploitation, Windows exploitation, network services, and steganography
- Used Nmap, Gobuster, Metasploit, Hydra, and John the Ripper for reconnaissance, exploitation, and privilege escalation; documented each with CVSS scoring and MITRE ATT&CK mapping

Technical Skills

Programming Languages: Java, Python, JavaScript, C, C++ Bash
Web Technologies: HTML, CSS, PHP
Database: MySQL
Version Control: Git, GitHub
Development Tools: Visual Studio Code, XAMPP, UTM
Operating Systems: Windows, Kali Linux, macOS
Security Tools: Nmap, Metasploit, Gobuster, Hydra, Suricata, Wireshark, Autopsy, Ghidra, Elasticsearch

Interests

- Play for the University Volleyball team
- Newspaper articles about current AI news
 - Cybersecurity

Certificates

- Google Cybersecurirty Professional Certificate
 - Young STEM Leader Award
-
